

MARCO MENESES

Business Administration & Analytics | Demand Planning, Operations & Reporting
Piscataway, NJ | marco.a.meneses05@gmail.com | 732-351-9353 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Business administration student with a business analytics minor and hands-on experience in demand planning and multi-site operations. Managed a 40-brand, 9,245-SKU supplier portfolio in RELEX, working the daily exception queue and escalating supply risk with supporting analysis, and ran operations for 10 locations and 20+ staff through a full season. Comfortable moving between the data and the floor: variance and root cause analysis, forecasting, reporting, and the SOPs that keep a distributed team consistent.

CORE COMPETENCIES

Demand Forecasting • Exception Management • Variance & Root Cause Analysis • Data Reconciliation • Supplier Portfolio Management (40 brands, 9,245 SKUs) • Inventory Positioning • Multi-Site Operations • KPI Reporting • Scenario & Sensitivity Analysis • Credit & Operational Risk • SOP Development • Stakeholder Escalation • Cross-Functional Coordination • Public Speaking & Presenting • Excel (modeling, pivot tables, lookups) • RELEX • PowerPoint • Claude Code and LLM workflows • English (native), Spanish (fluent)

Coursework: Managerial Economics, Data Analysis in Excel, Introduction to Finance, Marketing; Financial Accounting & Decision Making, Principles of Economics II, Law and Business (in progress)

PROFESSIONAL EXPERIENCE

SupplyHouse.com

Remote

Demand Planning Intern

Jun – Aug 2026

- **Demand planning** for a 40-brand, 9,245-SKU supplier portfolio spanning A- and B-tier suppliers, reviewing weekly forecast proposals and product-level exceptions in RELEX, an enterprise forecasting platform
- **Exception queue and root cause work** across forecast and order-proposal code families, prioritizing by impact, tracing causes in supplier-level data, and escalating supply risk to Demand Planning Team Leads with supporting analysis
- **Order proposal review** against trailing-order baselines using a four-order average methodology to separate genuine demand shifts from outliers before approving or revising quantities
- **Fulfillment center exposure** on an on-site assignment in Atlanta, seeing firsthand how forecast accuracy carries into slotting, robotics utilization, and fulfillment capacity
- **Cross-functional layout and automation exercise**, contributing the demand planning perspective and building the deck the team presented to operations leadership

Fox Pool Management

Newton, PA

Area Manager

May – Aug 2025

- **Multi-site operations ownership** for 10 locations and 20+ seasonal staff, covering scheduling, inventory, logistics, and incident response through a full season
- **SOP authoring** for the operating procedures the sites ran on, holding service standards consistent across a distributed team without daily oversight
- **Single escalation point** between property managers, staff, and ownership, resolving conflicts before they reached clients

MYLS AI

Remote

Growth Intern

Oct – Dec 2025

- **Metrics tracking and weekly reporting** on engagement and conversion across Instagram, TikTok, X, and Reddit for an early-stage AI startup, reporting to the founding team on which formats produced measurable growth
- **Audience segmentation research** to identify target communities, then coordinating micro-influencer partnerships against those findings

PROJECTS

Specialized Business Project, Wilkes University (2024–2025): Ran a \$1,000 startup fund end to end — built the P&L in Excel, forecast and managed inventory, priced and marketed the product, sold out 75 units in under a month, donated all net profit to The Salvation Army.

The Analyst's Edge, Founder & Editor (2026–Present): Write and publish a weekly newsletter on AI in business, analytics, and operations for early-career professionals; 335 LinkedIn subscribers, roughly 2,000 impressions.

PROFESSIONAL DEVELOPMENT

Greenwood Project

Remote

FinTech Academy Scholar

Jan 2026 – Present

- Selected for a competitive year-long FinTech program; weekly applied sessions covering data analytics, risk management, blockchain, and financial technology infrastructure

Goldman Sachs (Forage)

Virtual

Operations & Risk Management Job Simulations

Jan – Feb 2026

- Traced settlement and asset transfer breaks and coordinated resolution across Trading, Compliance, and Operations; separately built credit risk assessments and tested how variable changes moved total exposure

CERTIFICATIONS & LEADERSHIP

Certifications: Introduction to AI, Google (Mar 2026) | Introduction to Claude Cowork, Anthropic (Mar 2026)
